Standard - 20 amp GFCI

CODES/STANDARDS APPLICABLE

Specific Model meets or exceeds the requirements for the following standards:

ETL, UPC

NET WEIGHT 94 lbs

SHIPPING WEIGHT 119 lbs

INSTALLATION & CARE

INSTALLATION

Check the level and adjust if necessary by screwing or unscrewing the legs beneath the bathtub (maximum adjustment of 1" - 25 mm) and ensuring that the bathtub is always resting on all four legs while minimizing the space between the skirt and the floor (the skirt can rest on the floor but shall in no way support the weight the bathtub).

CARE

Acrylic is easy to clean with standard non-abrasive household cleaning products.

RECOMMENDED

When using the quick set rough-in drain kit there is no need for an access panel and the tub can be installed as close to the wall as possible.
